ENVIRONMENTAL AUDIT

Audit 6

JAMES POINT PTY LTD

Management of water issues, proposed harbour development.

A pollution management plan was prepared addressing potential impacts on groundwater and surface water for the proposed

Harbour development at James Point, Kwinana, WA as part of a Public Environmental Review (PER) document.

Potential impacts to the water environment include:

- Management of groundwater during construction
- Placement of a coffer dam intercepting groundwater flow & discharge
- Placement of fill behind the coffer dam
- Management of surface water during construction
- Management of surface water and spillages during on-going operations.

For each impact, mitigation measures were outlined to prevent unacceptable impacts from occurring. A series of proponent commitments were proposed to meet these objectives.
